

LANGSTONE HARBOUR BOARD

LOCAL NOTICE TO MARINERS NO.11 OF 2007

NOTICE TO SMALL CRAFT

SUITABILITY OF TENDERS

Owners of vessels on swinging moorings in Langstone Harbour should ensure that any tender used to transport personnel or equipment to and from their vessel is of a suitable size and construction and sufficiently stable to provide safe passage in all conditions likely to be encountered in the harbour. In assessing the suitability of any tender for use in the harbour the following factors should be considered.

- The strength of the tide
- The effect of wind on sea state
- The presence of vessels restricted in their ability to manoeuvre
- The likelihood of encountering wash from other vessels
- The remoteness of the parent vessel

In addition, a full appraisal of prevailing and forecast weather and sea conditions should be made whenever a tender is to be used in the harbour.

See Local Notice No.2/2006 for further safety information.
