## REPORT

To the Langstone Harbour Board.

We report on the Safety Management System, Issue 4, dated 27 July 2010.

We have reviewed compliance with the Safety Management System during the past year and conclude that in our opinion the Langstone Harbour Board have complied with the Port Marine Safety Code.

Some minor changes in records and procedures have led to the drawing up of a fifth issue.

We have reviewed this updated Safety Management System, Issue 5, dated 25 August 2011. In our opinion there is now in place a safety management system which complies with the requirements of the Port Marine Safety Code and enables the Langstone Harbour Board to continue to set out their safety policies, their organisation which can put them into practice and their procedures for a planned and systematic approach to policy implementation.
